

Ex.no: 02 CREATE USER PERSONA FOR YOUR MOBILE APP BY USING PERSONA CREATE TOOL.

Date:

Aim:

To create a user persona based on insights from an interview with a student in order to understand the background, goals, frustrations, and needs for designing the Echo Link app.

Description:

1. An interview was conducted, an active college student and club member, to capture the experiences with current club/committee management practices.
2. UXPressia was used to design the persona, as it provides a structured template for defining user goals, needs, frustrations, motivations, skills, and technology usage.
3. The persona included key sections such as background, goals, frustrations, needs, skills, quote, and brands/influencers (with logos of WhatsApp, Google Drive, and Instagram).
4. This persona served as a representative profile of a typical student user, helping identify what features and design considerations Echo Link must prioritize.

Tools Used:

UX PRESSIA

Marks Allocated	Marks Awarded
Observation/Record (20)	
Conduct of Experiment (30)	
Viva (10)	
Total (60)	

RESULT:

Thus, a detailed user persona of a student was created successfully.
